# Superior life safety protection

With Siemens addressable isolation devices

[everguardfiresafety.com](http://everguardfiresafety.com)

Siemens provides built-in isolation as a standard feature in all major devices, which gives you:

- Secure, maximum protection for a more reliable life safety system
- Flexible, on-demand isolation enables easy system expansion and modification
- Addressable isolation, making troubleshooting faster and easier

# Advantages to Siemens ISOtechnology:

## Easy Design

- Design with ease and flexibility with isolator capability.
- Decide now or later to use the built-in isolation feature
- No longer necessary to specify separate isolators
- Save time, money, and resources on design

## Superior Protection

- Secure reliable maximum protection in case of emergency.
- A short in one zone won't affect other zones or disable the system

## No Premium Cost

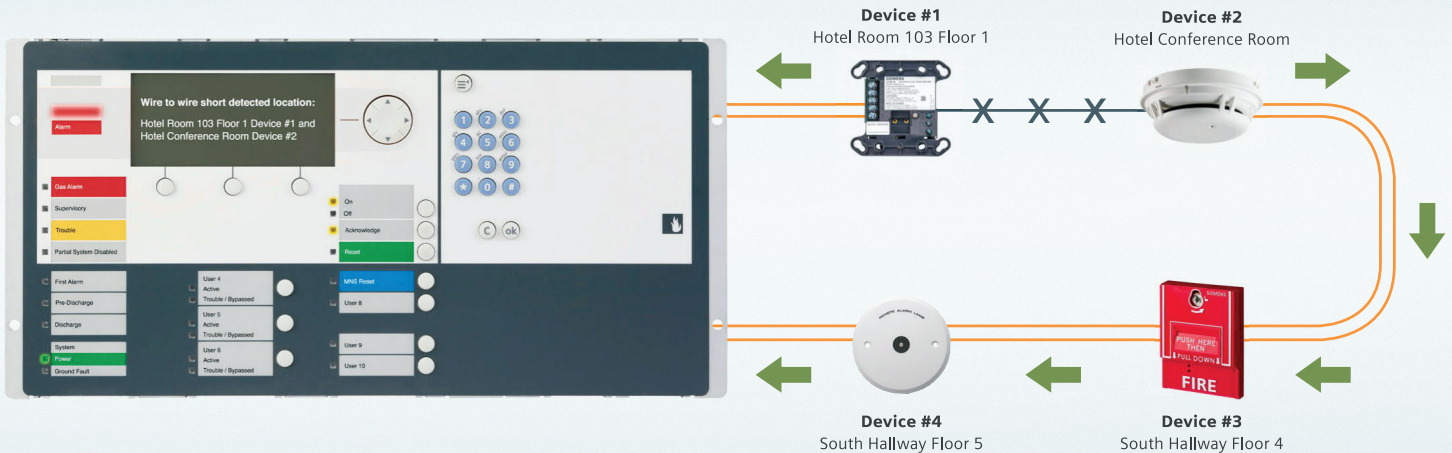

- Siemens field devices are isolation ready
- No additional cost in the standard products
- No additional product back-boxes or wiring to add to total system cost

## Less Installed Cost

- Reduced labor cost
- Reduced hardware cost

## Less Downtime

- Quicker troubleshooting responses because of detailed reports
- Technicians can fix the problem faster
- Ability to get the system back to optimal condition in no time
