WATER-BASED FIRE PROTECTION SYSTEMS

SPRINKLER SYSTEMS / FIRE HYDRANTS / BACKFLOW DEVICES / STANDPIPE & HOSE / WATER MIST

Fires can spread quickly, but sprinkler systems offer 24/7 protection, activating immediately to control flames and minimize damage. Designed for rapid response, sprinkler heads help reduce heat, smoke, and fire spread, improving safety and protecting your property and equipment.

At **Everguard Fire Safety**, our certified sprinkler technicians test, maintain, and repair all types of sprinkler systems, including dry, wet, pre-action, and deluge. We also offer a full line of Water Mist systems for certain hazards, or can offer an alternative Clean Agent System such as Inergen. With extensive experience in commercial and industrial settings, we ensure your system is ready to respond quickly to any fire. Regular inspections and maintenance help ensure optimal performance when you need it most. Trust in our expertise to keep you, your property, and your assets protected.

Did you know...

By adhering to NFPA 25 guidelines and scheduling regular maintenance, building owners can ensure their sprinkler systems remain reliable and effective.

The National Fire Protection Association (NFPA) 25 sets the standard for the inspection, testing, and maintenance of water-based fire protection systems. This ensures that sprinklers operate effectively in case of a fire, reducing property damage and saving lives.

Sprinkler systems require various levels of inspection:

- **Weekly:** To check for visual signs of damage, leaks, or obstructions.
- **Monthly:** To ensure valves are properly sealed, aligned, and operable.
- **Quarterly:** More in-depth checks on system components like pressure gauges, alarms, and control valves.
- **Annually:** Full flow testing to ensure water delivery meets design specifications.

A well-maintained sprinkler system is key to minimizing downtime and damage in the event of a fire, protecting both property and lives.

Life is priceless. The cost of a proper inspection and building life safety upgrades could be a lot less than you think! We can help protect you, your clients, your assets, and your investment.

COMPLIMENTARY SERVICES

Everguard Fire Safety's range of complimentary services support our core offerings, ensuring comprehensive safety and compliance. Services include:

- **Fire Risk Assessments** to evaluate fire hazards in a facility and provide recommendations to improve fire safety and ensure compliance with local fire codes and regulations.
- **Fire Safety Training** for proper use of fire extinguishers and fire suppression systems.
- **System Inspections and Testing** for fire extinguishers, alarms, suppression systems, smoke detectors, sprinklers, and emergency lighting.
- **Consultations** on-site to determine fire protection needs.
- **Maintenance Reminders** for upcoming inspections, testing, or maintenance schedules.
- **Design and Layout Advice** for placing fire safety equipment.
- **Customer Support** 24/7 emergency assistance for urgent issues.
